

```
#include <iostream>
using namespace std;
int main() {
    int x,y;
    char ch;

    cout<<"Enter value : ";
    cin>>x>>ch>>y;

    if (ch=='+' || ch=='-' || ch=='*' || ch=='/' || ch=='%')
    {
        if(ch=='+') cout<<x+y;
        else if(ch=='-') cout<<x-y;
        else if(ch=='*') cout<<x*y;
        else if(ch=='%') cout<<x%y;
        else cout<<x/y;
    }

    else cout<<"Invalid Operation";
    return 0;
}
```
