

```
#include<iostream>
#include<string>
Using namespace std;
class student {
public:
    int rollno;
    string name;
};
int main (){
    student s1;
    s1.name="kamal";
    s1.rollno=12345;
    cout<<s1.name<<endl;
    cout<<s1.rollno<<endl;
    return 0;
}
```
